1. The following is an examiner's statement of reasons for allowance:

In a fluid dispenser having a reservoir with a dispensing orifice and a spring means comprising front and back plates, the reservoir being situated between the plates, the inclusion of:

a cocking means comprising a spacer means that can be displaced selectively between an inoperative position in which the two plates extend substantially parallel to each other and corresponding to a state in which the volume of the reservoir is at its minimum, and an operative position in which the plates are spaced apart from each other, the front plate being movable relative to the back plate so as to compress the reservoir situated between them, actuating means being provided for positioning the spacer means between the two plates so as to space them apart the actuating means comprising a traction member provided with a fixing end connected to the spacer means and with a traction end, the traction end being situated in the vicinity of the dispensing orifice, was not found or fairly suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Bomberg whose telephone number is 571-272-
